

N-K Manufacturing Technologies LLC specializes in custom molding of plastics engineering through a variety of complex processes, such as:

- **Multi-shot molding, with specialty in two shot**
- **Vertical insert molding**
- **Overmolding**
- **Horizontal molding**
- **In-mold and Post Mold Decoration**

We partner with you to provide innovative, value-added solutions using a wide variety of thermoplastic and engineered resins that reduce manufacturing costs by:

- **Combining metal and plastic components**
- **Reduce weight**
- **Simplify assembly process**
- **Combining different types and textures of plastics**

We provide cradle-to-grave product development, design, manufacturing and assembly, including:

- **Engineering and design services**
- **Project management**
- **Finishing and assembly**

N-K is a single-source, vertically integrated, value-added provider of plastic solutions for the automotive, office furniture, appliance, consumer goods and related industries. Additional capabilities include extrusion and compression injection molding.
