

Industries Served

N-K Manufacturing wants to be every place you - and your customers - are. We can take you from home to the workplace and back home again. In between it all, we want to help build the vehicles that get you safely from one place to another.

Automotive: We like a challenge.

We've grown up in the automotive industry. We know that the name of the game is partnership. N-K Manufacturing partners with our customers to provide innovative solutions that reduce vehicle weight, extend service life, simplify assembly - and save money.

N-K Manufacturing has earned a reputation as a "go-to" company in the auto industry. When our customers have a problem with a design issue or a manufacturing process, they turn to N-K Manufacturing to solve their toughest problems.

From a concept to design validation, from prototype to production, we offer a full suite of services to reduce your overall project timing and cost.

Office Furniture: We build solutions that work.

The office furniture industry continues to look for ways to produce durable, comfortable and functional products for the workplace. Leading OEMs have partnered with N-K Manufacturing to shift from the metal and other materials now widely used and develop plastic components that are lighter, easier to assemble and yet dependable.

We make a broad range of office furniture solutions, from chair components and mechanisms to light assemblies and panel components.

Appliances: We have a growing place in the home.

N-K Manufacturing has been serving the appliance industry for nearly a decade. We produce sealing solutions for makers of large appliances as well as 2-shot applications for 'soft feel' handles and assemblies.

And we plan to build on this success and grow our stake in the consumer goods market.
