

Vertical insert molding

N-K Manufacturing specializes in the insert molding of a wide variety of components for the automotive, office furniture, appliance and other industries.

Insert molding allows you to combine metal parts with plastic components for a stronger, more functional, ready-to-assemble component. N-K Manufacturing has invested in technology that gives us the capabilities to handle multiple inserts and multiple materials.

We have expertise with complex molding processes that combine different types and durometers of plastics, as well as metal and plastic components for a finished product that offers:

- o Lower cost
- o Reduced weight
- o Enhanced performance
- o Easier assembly
- o Extended service life

We utilize a full-range of engineered plastic resins, including:

- o Santoprene
- o PVC
- o Acetel
- o Polypropylenes
- o GF Nylon
- o ABS
- o Nylon

Some of our products include:

- o Latches
- o Cawls
- o Reels
- o Catches
- o Shifters
- o Rod releases
- o Decorative trim
- o Arm caps
- o Over-molded casters
- o Glides
- o Finger guards
- o Top caps
- o Adjustment handles and knobs
