

## **Two-shot and multi-shot molding**

Two-shot and multi-shot molding allows you to combine different types and durometers of plastics into a single component that stronger and more durable.

### **Two-shot and multi-shot molding offers:**

- Lower costs
- Improved quality
- Enhanced performance

### **We utilize a full-range of engineered plastic resins, including:**

- PVC
- TPR
- TPE
- SEBS
- Nylon
- ABS
- Polypropylenes

### **We use both true two-shot and overmolded processes, and concentrate on products and assemblies in the following insert-molded areas:**

- 'Soft touch' handles
- Two-shot seals
- Column shifter boots
- Detents
- Secondary and primary seals
- Lens seals

### **Additionally, we offer a variety of sealing applications utilizing a broad range of engineered plastic resins, including:**

- PVC
- PP
- SBS
- TPEs

**QS 9000 - ISO 9001 - ISO 14001**
