

Two-shot and multi-shot molding

Two-shot and multi-shot molding allows you to combine different types and durometers of plastics into a single component that stronger and more durable.

Two-shot and multi-shot molding offers:

- Lower costs
- Improved quality
- Enhanced performance

We utilize a full-range of engineered plastic resins, including:

- PVC
- TPR
- TPE
- SEBS
- Nylon
- ABS
- Polypropylenes

We use both true two-shot and overmolded processes, and concentrate on products and assemblies in the following insert-molded areas:

- 'Soft touch' handles
- Two-shot seals
- Column shifter boots
- Detents
- Secondary and primary seals
- Lens seals

Additionally, we offer a variety of sealing applications utilizing a broad range of engineered plastic resins, including:

- PVC
- PP
- SBS
- TPEs

ISO 9001 - ISO 14001
